SPECIFIC DETAILS

Population data

Data for each quarter is examined, and compared to the 2001 population census data. Communities within Humberside have changed dramatically since 2001, however Police Criminal Evidence Act Codes of Practice direct that census data be used for comparison. Population figures are believed to be up to between double and three times the 2001 census figures. ***This should be borne in mind during the scrutiny process***

Stop Search data and Stop & search leading to arrest
Highlight this Quarter
Force wide there has been an increase in figures and percentages of stop/talk and search. In D Division there has generally been an increase however the numbers of stop/searches are up by 1300. C Division stop talks still make up a large percentage of all stop/talks force wide.
Force wide there appears to be disproportionality between the percentage of BME and white arrests and this is of particular note in C and D Divisions where the number of BME stop searches has significantly increased on the last quarter.

DCC's Scrutiny Panel Action
C and D Division to perform a dip sample into BME arrests as a result of stop and search and check the outcomes.
B Division to investigate the low figures for Stop and Search and report.

DCC's Scrutiny Panel
Mr Griffin questioned why there has been an upsurge in numbers and requested that C and D Division perform a dip sample into BME arrests as a result of stop and search and check the outcomes.
Mr Khan noted that B Division figures represent very small numbers.

Highlight Year to Date
Force wide when comparing percentages there is a large disproportionality between percentage white arrests and percentage BME arrests, all BME figures with the exception of B Division are significantly higher than white arrests
Year to date force wide when comparing percentages there is a large disproportionality between percentage white arrests and percentage BME arrests, all BME figures with the exception of B Division are significantly higher than white arrests.

Disposal methods for prisoners
This quarter the percentage figures are largely similar to those of the last quarter, however the actual number of white prisoners to court (not on remand) and on bail to Police Station have risen by over 100, these rises are mirrored with BME prisoners however the numbers involved are somewhat lower.
Again this quarter and year to date there is a larger percentage of BME prisoners NFA'd than white prisoners

DCC's Scrutiny Panel
Mr Griffin noted that in relation to NFA although other forces have had problems in this area the figures presented appear to be acceptable.

Mr Griffin noted that in relation to NFA although other forces have had problems in this area the figures presented appear to be acceptable.

Force tickets issued

Force wide the number of tickets issued generally has risen on the last quarter with the exception of VDRs. The number of tickets issued to the BME community has increased on the last quarter. The number of unknown ethnicity with the exception of HORT1s has decreased on the last quarter.

DCC's Scrutiny Panel

Mr Griffin noted in relation to HORT1s which can cause problems the force does not appear to have disproportionality.
It was noted that the number of endorsable tickets issued in D Division has decreased this quarter.

Racially & Religiously aggravated crime

Force wide and in each Division the numbers of recorded incidents has decreased slightly on the last quarter.
There has been an increase in detection rates force wide and in A and C Divisions. B and D Division have seen a small decrease, however for the rolling yea D Division's detection rate remains higher than the force average.

In relation to the C Division detection rate - the original reports from CIS4 reports have been checked.
The eight with recorded dates between 1/1/2011 and 31/3/2011 are shown on CIS4 recorded totals sheet.
The nine with detected dates between 1/1/2011 and 31/3/2011 are shown on the CIS4 detected totals sheet. The detected total was boosted by five which were recorded in 2010 but not detected until this quarter. This therefore looks like one of the rare cases where the detection rate really is above 100%

DCC's Scrutiny Panel

Mr Khan reported that force wide there has been a slight decrease in the number of reports. There has been an increase in detection rates in A and C Division; however there appears to be a steady decline in the detection rate in D Division.
Chief Inspector Walker explained that B Division have been using Discretionary Outcomes, the community approve of this approach however the figures do not count towards these statistics or the Police Authority targets.

DCC's Scrutiny Panel Action

B Division to investigate the proportion of incidents disposed of in a discretionary way and check whether there were outcomes in these incidents.
