**SPECIFIC DETAILS****Population data**

Data for each quarter is examined, and compared to the 2001 population census data. Communities within Humberside have changed dramatically since 2001, however Police Criminal Evidence Act Codes of Practice direct that census data be used for comparison. Population figures are believed to be up to between double and three times the 2001 census figures. \***This should be borne in mind during the scrutiny process**\*  
Up to date census figures are due to be published in 2011.

**Stop Search data**

There has been an increase in the number of white stop and searches, with the exception of A Division.  
The number of BME stop and searches has increased on the South Bank but decreased on the North Bank.

In relation to the Year to Date figures, the total number of stop and searches have generally fallen in comparison to previous data, as have white stop and searches force wide with the exception of B Division.

**Stop & search leading to arrest**

The number and percentage of white arrests in C Division is markedly lower than the other Divisions on a recurring basis.  
With the exception of D Division which is only 1 in number, there have been no other BME arrests.

In relation to the Year to Date figures the number of white arrests has fallen except for in D Division, there are fluctuations in the number of BME arrests, however the numbers involved are small, as are the level of arrests.

**Disposal methods for detainees**

The number of disposal methods used this quarter has decreased by over 200, the majority of the decreases being for white prisoners and relate to, to court (not on remand) and NFAs.

There appears to be some disproportionality in a number of disposal methods used between white and BME prisoners, namely warnings, on bail to Police Station, TICs and NFAs.

In comparison to previous data, the total number of disposals for Year to Date figures have increased slightly.

There are fluctuations in the number and percentages of disposal methods used, the most notable decreases for BME for Warnings and NFAs and the increase in TICs.

There is some disproportionality in the percentages between white and BME prisoners in relation to Warnings, on bail to Police Station and TICs.

**Force tickets issued**

There are fluctuations in the number of tickets issued, the largest being for Endorsable Notices issued to White - North European. Although small numbers, the number of Endorsable Notices issued to Middle Eastern and White - South European have nearly doubled on the last quarter.

There has been an increase of nearly 50% in the number of Non Endorsable and VDR Notices issued to Asians, however the numbers are small.

In relation to the Year to Date figures no comparisons can be drawn to previous data as no information was available.

**Racially & Religiously aggravated crime**

There have been an increase in the number of Racially and Religiously Aggravated Crimes this quarter, however with the exception of D Division the number of crimes detected has decreased.

Again force wide with the exception of D Division, detection rates have fallen dramatically this quarter.
